SUMMARY

Junior Backend Developer with a strong interest in software development and web technologies. Experienced in developing web applications through academic projects, internships, and personal projects. Familiar with PHP, Laravel, MySQL, Next.js, REST API, and modern web development practices. Eager to continuously learn new technologies, solve technical challenges, and contribute to the development of reliable and efficient software solutions.

WORK EXPERIENCE

Web Developer – PT Pundi Puri Sejahtera

February - Present

- Redesigned and developed company websites within the Pundi ecosystem using Next.js, Tailwind CSS, and Shadcn/UI for responsive user interfaces.
- Built a centralized CMS with role-based access control to manage and distribute news content across multiple platforms, using Drizzle ORM and MySQL for scalable backend operations.
- Successfully integrated and deployed an on-premise e-meterai system (PERURI) into production using containerized Docker adapters on Ubuntu Server, and currently heading the integration of the e-sign API.

Fullstack Intern – PT Anak Muda Digital (Chameleon)

August - November 2025

- Develop and customize WordPress-based websites using Elementor, plugins, and custom snippets according to client requirements.
- Coordinate with the Project Manager and clients to ensure all project requests and requirements are met.
- Test website responsiveness on various devices to ensure optimal display and functionality.
- Complete work within tight deadlines and work well under pressure.

Web Developer – PT Cipta Sukses Globalindo

March - June 2024

- Design and implement an admin dashboard system with login, product management, customer, and service features.
- Develop a full-stack admin dashboard system using Laravel (backend), Tailwind CSS (frontend), and MySQL (database).

SKILLS

- **programming language** : Javascript, PHP, Python, Flutter
- **Back End** : Laravel, Node js, Rest API, Express js, MySQL, MVC, Flask, Postman
- **Front End**: Next js, HTML, CSS, Tailwind ,Bootstrap, Framework, ShadcnUI
- **Other Skills** : Git, Docker, Wordpress, Jest, Microcontroller, Canva, Figma
- **Languages**: English, Mandarin
- **Awards/Activities**: Successfully passed the national selection for the Student Creativity Program (PKM) and received funding

PROJECT EXPERIENCE

E-Meterai Portal	Ongoing
• Design and develop a centralized e-meterai management portal to facilitate rapid, secure, and synchronized digital document stamping. • Integrate core modules including quota top-ups via Midtrans payment gateway, automated document stamping workflows, and real-time serial number (SN) log monitoring. • Containerize the application using Docker to improve development workflow, ensure environment consistency, and streamline deployment efficiency.	
Multi-Site News CMS	Ongoing
• Develop a centralized CMS platform for managing and publishing news across multiple company websites. • Implement role-based authentication and content management workflows. • Built using Next.js, Tailwind CSS, Shadcn/UI, MySQL, and Drizzle ORM.	
MyPortfolio (Personal Web Portfolio)	November - Desember 2025
• Design and develop a high-performance personal portfolio website using Next.js and Tailwind CSS to establish a professional digital presence. • Implement responsive design principles and modern UI/UX patterns to ensure seamless navigation across mobile and desktop devices. • Integrate dynamic project sections to showcase full-stack applications, utilizing Next.js features such as Image Optimization and Fast Refresh for enhanced user experience.	
Ship Alert (Smart Hazard Identification Protocol)	April – August 2024
• Successfully passed the national selection for the Student Creativity Program (PKM) and received funding for the Ship Alert – Smart Hazard Identification Protocol project among thousands of other participants. • Successfully carried out research and development of the project to the final stage in a timely manner. • Built a prototype of the “Ship Alert” device and successfully presented it to the jury in the final evaluation forum.	

ORGANIZATIONAL EXPERIENCE

Informatics Student Association (HIMAFORKA)	July – December 2024
Members of the PDD Division – Publication, Design, and Documentation	
• Documented organizational events through photo and video content. • Assisted in managing social media publications and digital communications. • Contributed to promotional and visual design materials.	
Public Relations Division Member	
• Convey information effectively. • Manage HIMAFORKA social media.	

CERTIFICATION

Junior Web Developer (National Professional Certification Board)	
Digital Talent Scholarship - (Jul 2023 - Jul 2028)	
<u>JavaScript Learning Class Certificate</u>	<u>Express.js Basic Learning Class Certificate</u>
<u>CODEPOLITAN - (Jun 2023 - Jun 2026)</u>	<u>CODEPOLITAN - (Jul 2023 - Jul 2026)</u>
<u>BACKEND DEVELOPMENT INTRODUCTION</u>	<u>API INTRODUCTION</u>
<u>E-Learning - MySkill - (November 16, 2024)</u>	<u>E-Learning - MySkill - (November 17, 2024)</u>
